

PROPOSALS 2.3M ARISTARCHOS TELESCOPE 2017

| ATP No | P.I. | TITLE |
|---------------|-------------------|--|
| 2017-01 | Alikakos | Active binaries - Accretion disks |
| 2017-02 | Bonanos | Stellar and super-massive black holes in Gaia transients |
| 2017-03 | Boumis | Revealing the morphological features of New IPHAS Planetary Nebulae |
| 2017-04 | Boumis | Ageing Nova Shells |
| 2017-05 | Boumis | Morphological and kinematical study of large Galactic Supernova Remnants |
| 2017-06 | Christopoulou | Orbital Solutions for Catalina Sky Surveys Eclipsing Binaries of W UMa Type showing Total Eclipses |
| 2017-07 | Gazeas | Total Eclipses of W UMa type stars as probes for stellar evolution |
| 2017-08 | Loukaidou | Contact binaries towards merging |
| 2017-09 | Plionis | Multicolor (narrow and broad-band) imaging to probe the local environment of nearby AGN galaxies |
| 2017-10 | RISE2 - ExPI | Detecting Transit-Timing variations (TTV) of extrasolar planets using RISE2 |
| 2017-11 | Sokolovsky | Photometry of a new candidate magnetic CV |
| 2017-12 | Xilouris | The structure of extragalactic bars in spiral galaxies |
| 2017-13 | Opticon - Sicardy | The stellar occultation by Neptune's satellite Triton, Oct. 5/6, 2017 |
